

IKON / Document Solutions Portfolio

PRODUCTION SOLUTION

The IKON Document Solutions Portfolio is a comprehensive offering of end-to-end solutions designed to address document management needs at all phases of the document lifecycle: capture, workflow, output and retention.

IKON selects products for the portfolio based on a flexible, open architecture and standards-based technologies to ensure interoperability as well as extensibility of functions between new and existing systems.

IKON delivers the portfolio solutions through its team of Professional Services specialists who assess, customize, install, manage, service and support end-to-end solutions.

IKON PowerPRESS™

IKON PowerPRESS

Business Challenges Addressed

- Budget constraints force in-house corporate print centers to choose between purchasing a production engine, multiple engines for redundancy, or adding color.
- The fast-paced Print-on-Demand (POD) environment causes resource contention.
- University print centers spend much of their time manually assembling course packs, hand merging documents, incorporating scanned material, inserting tabs and adding color inserts.
- Legal print centers incur expenses outsourcing TIFF Blowback and Bates Stamping.

Solution Overview

IKON's PowerPress leverages current platform and operating system technology to deliver powerful digital prepress and streamlined workflow capabilities. PowerPress Universal Servers drive up to 12 print engines from a single server and provide significant impact with advanced make-ready tools, optimized job throughput and outstanding quality. The flexible, scalable design provides a growth path to meet future demands with color and black and white engines, Raster Image Processors (RIPs) and software features easily added.

Solution Differentiators

Unsurpassed tab handling

- Select all tab locations at once from thumbnail
- View, insert and edit text for all tabs from a single dialog box
- Supports bitmapped and multi-line tabs
- Automatically detects margin text in electronic or scanned documents to generate tabs

TRueEdit post RIP editing

- Total independence from original application/author for changes
- Edits do not require reprocessing; files print immediately
- Easy to merge jobs, delete page numbers, renumber, insert tabs, impose and apply any other formatting

Remote TRueEdit

- Accesses RIPped documents from other PCs
- Allows multiple users to edit documents simultaneously

- Reduces resource contention
- Streamlines workflow and improves productivity

An Integrated Solution

- Engines supported:
 - Canon iR 85/7200/8500/105
 - Canon CLC 1180/1140/1110
 - Canon CLC 5000/3900/5100/4000
 - Canon iR 110/150
 - Ricoh Aficio 6513
 - Ricoh Aficio 1060/1075
 - Ricoh Aficio 2090/2105
 - Ricoh Aficio 3800C
 - Ricoh Aficio 2238C/2438C
 - Konica Minolta Di850
 - Konica Minolta Di750
 - Konica Minolta CF 8050 (October/November)
 - Hitachi DDP 90
 - Hitachi DDP 70

SOLUTION FEATURES	SOLUTION BENEFITS
VIPP data stream conversion	Accepts data streams destined for Xerox devices and prints them to PostScript printers
Dual monitors	Helps provide more functionality and flexibility
Extended storage	Allows archiving old files, sharing new files, special projects housing or spillover storage
RIP software	Common RIP across multiple vendors
